

How to receive discounts to students?

best research paper writing service

What is needed to obtain student benefits?

Unfortunately, not all college students and higher educational institutions can count on preferential conditions.

It is necessary to meet two important criteria:

1. The student should receive education exclusively in the Russian institution. In case the Higher Educational Institution is a branch of any foreign university, then preferential conditions will not be provided.
2. The separation must be a day (or full-time). Students of the correspondence (or evening) branch also rely discounts, but completely on another program and in a smaller volume.

If the student falls under both categories, then we are in a hurry to please that there are a lot of preferential offers. Not all students know that they have the opportunity to significantly save on their expenses, using the status of the student.

Preferential passage for students

Higher education institution is quite often located apart from student hostels and residential buildings, unlike schools. This brings students to the question of regular use of public transport.

Despite the fact that the cost of one pass on intracity transport in Russia is small, a month can be brought into a month. Daily trips, often several times a day (if necessary, getting into different training corps) strongly beat on student pocket.

In this regard, all students are invited to arrange a student's social card. Thanks to her, it appears the opportunity to purchase a ticket for one or three months at a discount.

This document applies to all types of public transport, except for the route taxi, that is, the passage acts on the subway, the bus, tram and trolleybus.

In recent years, even private organizations providing a taxi service began to take 5-10% discount upon presentation of a student ticket.

Another good news for nonresident student will be a 50% discount on the train. It is only necessary when buying a ticket to present any document confirming your student status.

If necessary, take advantage of discounts for long-distance trains, it is recommended to become a member of the project, referred to as Railways Bonus. Students, as well as graduate students, provide a benefit of 25% for travel in coupe-wagons on such high-speed trains, like "Strizh", "Swallow", "Nevsky Express" and some others.

In order to become a member of the Russian Railways Bonus program, it will be necessary to pass 3 simple stages:

1. To register on the RZD personal site.
2. Get a certificate from the dean a certificate confirming the status of a student and belonging to this university.
3. Scan the received certificate and attach it to the Personal Account on a previously registered Railways website.

Cultural enlightenment

This is a good news for trainees on the correspondence department. All students have the right to visit the State Museum and Library.

However, some museums still ignore this fact by offering to pay the ticket, but according to the "preferential" cost.

In this regard, we suggest familiarizing yourself with a number of museums, where the visit to the student is absolutely free:

1. Visit the magnificent Tretyakov Gallery in Moscow in Moscow in the first and second Sunday monthly.
2. Every second Sunday day for all students in higher education institutions opened the State Museum of Fine Arts named after Alexander Sergeevich Pushkin.
3. All state historical museums provide the possibility of free visiting on the last Sunday of the month.
4. In the museum association "Museum of Moscow" for pupils of the day branch, visit is free on any day.
5. Museums of the history of the Gulag, Defense of Moscow and historical houses also provide the opportunity to visit the exhibition absolutely free.

It is worth noting that free days visits may vary, in connection with which it is recommended to first make a call to the museum for clarification.

Separately, it is worth mentioning the cinemas that provide perhaps the largest discounts for students. Often, preferential conditions can reach 50% of the total cost.
